

The Excellence in Quality Improvement Certificate Program (EQUIP) 2022–23

Overview

The goal of the EQUIP program is to train current and future QI faculty members to help academic departments and universities address the pressing need to develop capacity in QI. The EQUIP program's enriched content and deeper dive into QI methodologies make projects more likely to succeed, and will prepare participants to maximize their project's impact and receive academic recognition for their work.

Who is EQUIP for?

- Academic faculty seeking to more meaningfully integrate QI into their clinical or scholarly activities
- Faculty who have an organizational QI role in their department or hospital and would like to develop advanced skills to increase their likelihood of success
- Senior trainees wanting to make QI an academic career focus

Course application and fees

Registrants must submit an application form consisting of:

- Applicant information
- An abbreviated CV (max. 5 pages)
- A personal statement (max. 500 words)
- A letter of support from a department head or chief (or program director for trainees) on official letterhead with their contact information, confirming that the applicant works or trains in an academic institution where they will carry out a QI project as part of this course

Please email the complete application to education@cquips.ca.

Application deadline: Rolling deadline with applications reviewed and accepted between February and June 2022.

We will accept applications until June 30, 2022 and notify all applicants by the end of June.

Course fee: \$6,500 CAD

Key dates

- **July 18–20, 2022**
Three-day virtual session
- **Sept. 2022 to April 2023**
Seven monthly webinars
Project coaching
- **May 3–5, 2023**
Three-day virtual session

"The course content is extremely high yield and practical. You meet national and international colleagues who you can learn from and become future collaborators.

The faculty are world-renowned and the course gives you a network base of QI leaders. I have maintained connections with many of the certificate's faculty which has led to wonderful opportunities. It is the most worthwhile continuing education I have done that has had a measurable and lasting impact on my career."

– Dr. Samara Zavalkoff,
2018 EQUIP graduate
Medical Director of Quality
and Safety, PICU
Montreal Children's Hospital

Key features of the EQUIP program

1

A deeper dive into QI

- The EQUIP program's enriched content goes beyond a superficial introduction to QI principles. It takes a deeper dive into QI methodologies and will maximize participants' project impact, making them significantly more likely to succeed.

2

Expert faculty who are clinicians with real-world QI expertise

- The multidisciplinary EQUIP faculty members have a track record of successfully executing QI projects in academic settings. Their project work has produced publications in high-impact journals such as JAMA Internal Medicine, Academic Medicine, and BMJ Quality & Safety.
- Core faculty members have made significant contributions to local, national and international educational programs in QI and patient safety through collaboration with organizations such as the Royal College of Physicians and Surgeons of Canada and the Association of American Medical Colleges.

3

Dedicated project coach provides tailored advice on your QI projects

- Each participant is assigned an EQUIP faculty mentor who has a wealth of experience executing successful QI projects in academic settings. They provide one-on-one coaching and support for projects over the course of the program.
- The impact of interactive small group learning is maximized with a low faculty-to-participant ratio (1:3). This allows for personalized feedback on participants' QI projects.

4

Emphasis on academic skill development

- EQUIP's enriched content and deeper dive into QI methodologies will not only make your projects more likely to succeed, but also foster:
 - Scholarly writing for optimal dissemination of QI innovations;
 - Teaching QI including role-modelling and project supervision;
 - Advanced quantitative and qualitative evaluation methods;
 - Preparing a portfolio for academic promotion on the basis of QI

5

Graduates receive an academic certificate in QI

- Upon successful completion of EQUIP, participants are granted an academic certificate in quality improvement from the University of Toronto.

Preliminary agenda - July 2022

	Monday, July 18	Tuesday, July 19	Wednesday, July 20
Morning	<p>Common QI pitfalls: Why many projects fail and what you can do about it</p> <p>Strategic selection of QI projects to maximize likelihood of impact and success</p>	<p>Diagnostic tools for characterizing quality problems</p> <p>Common QI interventions along the Hierarchy of Effectiveness</p> <p>Incorporating an equity lens to your QI work</p>	<p>Authentic use of PDSA to refine your QI intervention</p> <p>Anticipating problems and overcoming challenges to maximize return on your PDSA cycles</p>
Afternoon	<p>Developing a QI measurement framework</p> <p>The power of small samples</p>	<p>Design thinking</p> <p>Evaluating your QI impact: Statistical process control (SPC)</p>	<p>Applying ethical principles to your improvement work</p> <p>Leading change through meaningful stakeholder engagement</p>

September 2022 to April 2023

Project work

Participants carry out their QI project work at their local institutions

Monthly teleconferences

Seven monthly webinars cover additional course content (e.g., qualitative methods, academic writing, teaching QI) and provide participants the opportunity to get direct feedback from peers and faculty coaches on their QI projects. Each webinar group consists of 4-5 participants and 2 faculty coaches.

Coaching

Participants will be assigned an EQUIP coach. Through the use of cloud-based technology, coaches will monitor QI project progress and provide feedback and ongoing support

Preliminary agenda - May 2023

	Monday, July 18	Tuesday, July 19	Wednesday, July 20
Morning	<p>Capstone project presentations</p>	<p>Building your academic focus</p>	<p>How to supervise QI projects</p>
Afternoon	<p>Developing a business case for your QI work</p>	<p>Concurrent sessions</p> <ul style="list-style-type: none"> Advanced quantitative methods Advanced qualitative methods SPC 2.0 	<p>Effective writing strategies to publish your QI work</p>

3. Abbreviated CV

Please attach your abbreviated CV, maximum 5 pages, to this application.

4. Letter of Support

Please include a letter of support from a department head or chief (or program director for trainees) on official letterhead with their contact information, confirming that you work or train in an academic institution where you will carry out a QI project as part of this course.

- For **faculty**, the letter should confirm that you have an active academic appointment or defined organizational role in QI.
- For **trainees**, the letter should confirm that you are on a clear track towards an academic appointment with a focus in QI.

Your sponsor has the option to submit the letter directly to Ms. Lisha Lo (education@cquips.ca).
