

Certificate Course in Patient Safety and Quality Improvement

General information and application instructions for 2026-2027

The Certificate Course is aimed at **health professionals** (e.g., clinicians, allied health professionals, administrators) whose work relates to patient safety or quality improvement, as well as **senior trainees** considering a focus on patient safety and quality improvement for their careers.

The course consists of approximately **60 hours** over nine months, covering core concepts in quality improvement and patient safety, using a mixture of didactic lectures, workshop-type sessions in breakout groups, and presentations by participants*. Throughout the course, participants will **undertake a quality improvement (QI) or patient safety project** as a means of getting practical, hands-on experience, while simultaneously applying core learning concepts. This project does not necessarily need to be a new initiative. In fact, embedding the project work within an ongoing institutional QI effort can allow for a more meaningful course experience.

Participants will be assigned a **QI coach** who will guide them throughout the course, creating a rich and personalized learning experience, and increasing the success of their proposed projects. This course also provides an opportunity for participants to network with other individuals passionate about patient safety and quality improvement. The relationships built often continue beyond the duration of the course, which many previous participants have found beneficial as they continue to build their careers.

**For 2026/2027 session, the course will consist of a mix of in-person sessions and specifically designated virtual sessions to optimize learning. Please note that in-person sessions will NOT have a virtual option.*

<p><u>Course directors:</u> Chandra Farrer Dr. Bourne Auguste</p> <p><u>Course delivery:</u> In-person or virtual depending on session content</p> <p><u>Time (Sept 2026-June 2027):</u> Tuesday afternoons, 1-4:15pm</p> <p><u>In-class sessions:</u> Specific dates to be determined.</p> <p><u>Course fees:</u> Faculty/staff physicians: \$5995 Health professionals and trainees: \$3750</p>	<p><u>Key concepts covered include:</u></p> <ul style="list-style-type: none"> • Common QI methods and tools • Methods for characterizing quality/safety problems • Measurement of quality & patient safety projects: <ul style="list-style-type: none"> ◦ Quantitative methods (e.g., run charts) ◦ Qualitative methods in safety and quality • Resource stewardship • Patient safety topics: <ul style="list-style-type: none"> ◦ Safety culture ◦ Human factors ◦ Incident analysis ◦ Communication & teamwork • Patient engagement in QI • Equity in QI • Leading change • Health informatics • Lean principles • And more.....
